## introduction:

On the 16<sup>th</sup> of November 2018 "Scouts for SDG's" was launched at the United Nations (UN) headquarters in New York – "an unprecedented mobilisation of our Movement that will see 50 million Scouts make the world's largest coordinated youth contribution to the Sustainable Development Goals (SDG's) for 2030".

Check out the [SDG Challenge page](#) on the [SCOUTS South Africa website](#) and the [WOSM Scouts for SDGs initiative](#) for lots more information.

## how can we help?

In order to achieve a better and more sustainable future for all, we all have a role to play.

This is where Scouting comes in.

*"Since its beginnings, Scouting has been enabling young people from every corner of the globe to create positive change in their communities, acting on challenges and needs at all levels of society. It uses an action-orientated, self-educational approach to contribute to the empowerment and holistic development of young people as autonomous individuals and active global citizens."*

For the next few years, the SCOUTS South Africa National Challenge for Meerkats and Cubs and the SDG challenge for Scouts, Rovers and Adults will focus on a number of SDG's. Last year we focused on SDG 1 to 4, which can still be tackled by members if they wish.

## the 2020 challenge:

This year's SDG Challenge will focus on **SDG's 5, 13, 14 and 15**, being gender equality; climate action; life below water and life on land.

SSA members who complete the challenges for SDG 5, 13, 14 or 15 can earn a badge for each. Those who have earned all the 2019 SDG Challenge badges – or are planning on completing them – as well as the four 2020 SDG Challenge badges, will qualify for the "SDG Champion Badge"!

## sdg 5: achieve gender equality and empower all women and girls.

## sdg 13: take urgent action to combat climate change and its impacts.

The negative effects of climate change are already visible in so many aspects of life. Offsetting the impact of climate change starts with education, awareness, and individual action. We can all do something small to offset our footprint on this planet that we call home.

## sdg 14: conserve and sustainably use the oceans, seas and marine resources for sustainable development.

Oceans and seas cover over 70% of our planet. Our existence depends on them for food, water, energy, and more, yet they're suffering from overfishing and plastic pollution. By keeping our oceans clean and our fish stocks healthy, we'll ensure that the Earth will remain habitable for humankind for centuries to come.
